

EvidenceRecord EVIDENCE-RECORD_InfoNotary-Qualified-TimeStamping-Service-2026_20260916-1638**PASSED****Validation Process for Evidence Records** (Lowest POE : 2026-09-16 16:38:29 (UTC))**PASSED**

- Has the reference data object been found?
Reference : EVIDENCE_RECORD_ARCHIVE_OBJECT ✓
- Is the reference data object intact?
Reference : EVIDENCE_RECORD_ARCHIVE_OBJECT ✓
- Is at least one covered data object has been found? ✓
- Does first hash value list contain only data objects provided to the validation? ✓
- Is the result of time-stamp validation process conclusive? ✓
Evidence Record Timestamp with Id = TIMESTAMP_InfoNotary-Qualified-TimeStamping-Service-2026_20260916-1638, production time = 2026-09-16 16:38
- Are cryptographic constraints met for the evidence record? ✓
Digest algorithm SHA256 at validation time : 2026-09-16 16:38

Algorithm Obsolescence Validation :**PASSED**

- Are cryptographic constraints met for the evidence record archive data object?
Digest algorithm SHA256 at validation time : 2026-09-16 16:38 for evidence record archive data object with name : Удостоверение_банкова_сметка_Виктор_Левунлиев_signed.pdf ✓

Timestamp TIMESTAMP_InfoNotary-Qualified-TimeStamping-Service-2026_20260916-1638**PASSED****Validation Process for Basic Time-stamps** (Production time : 2026-09-16 16:38:29 (UTC))**PASSED**

- Is the result of the 'Identification of Signing Certificate' building block conclusive? ✓
- Is the result of the 'X.509 Certificate Validation' building block conclusive? ✓
- Is the result of the 'Cryptographic Verification' building block conclusive? ✓
- Is the result of the 'Signature Acceptance Validation' building block conclusive? ✓

Validation Process for Time-stamps with Archival Data (Lowest POE : 2026-09-16 16:39:32 (UTC))**PASSED**

- Is the result of the Time-stamp Validation Building Block acceptable? ✓
- Is the result of basic time-stamp validation process conclusive? ✓
- Is the digest algorithm reliable at lowest POE time for the time-stamp token?
Digest algorithm SHA256 at validation time : 2026-09-16 16:39 for time-stamp message imprint with Id : TIMESTAMP_InfoNotary-Qualified-TimeStamping-Service-2026_20260916-1638 ✓

Time-stamp Qualification**QTSA**

- Has a trusted list been reached for the certificate chain? ✓
- Is the list of trusted lists acceptable?
Trusted List : <https://ec.europa.eu/tools/lotl/eu-lotl.xml> ✓
- Is the trusted list acceptable?
Trusted List : https://crc.bg/files/_en/TSL_BG.xml ✓
- Has an acceptable trusted list been found? ✓

Time-stamp Qualification at time-stamp generation time**QTSA**

- (2026-09-16 16:38:29 (UTC))
- Is the certificate related to a TSA/QTST? ✓
- Is the certificate related to a trust service with a granted status? ✓
- Is the certificate related to a trust service with a granted status at time-stamp generation time? ✓

Time-stamp Qualification at time-stamp lowest POE time**QTSA**

- (2026-09-16 16:39:32 (UTC))
- Is the certificate related to a TSA/QTST? ✓
- Is the certificate related to a trust service with a granted status? ✓
- Is the certificate related to a trust service with a granted status at time-stamp lowest POE time? ✓

Basic Building Blocks**TIMESTAMP - TIMESTAMP_InfoNotary-Qualified-TimeStamping-Service-2026_20260916-1638****Identification of the Signing Certificate :****PASSED**

- Is there an identified candidate for the signing certificate? ✓
- Is the signed attribute: 'cert-digest' of the certificate present? ✓
- Are the issuer distinguished name and the serial number equal? ✓

X509 Certificate Validation :**PASSED**

- Can the certificate chain be built till a trust anchor? ✓
- Is the validation time before the certificate's trust sunset date?
Certificate's trust anchor does not have (yet) a sunset date ✓
- Has a prospective certificate chain valid at validation time been found?
Validation time : 2026-09-16 16:39 ✓
- Is the certificate validation conclusive?
Certificate Id = CERTIFICATE_InfoNotary-Qualified-TimeStamping-Service-2026_20260512-1429 ✓
- Is the certificate validation conclusive?
Certificate Id = CERTIFICATE_InfoNotary-Qualified-TimeStamping-Service-CA_20170629-1524 ✓

Certificate CERTIFICATE_InfoNotary-Qualified-TimeStamping-Service-2026_20260512-1429 :**PASSED**

- Is certificate not self-signed? ✓
- Is the certificate signature intact? ✓

Does the certificate's issuer DN match the subject DN of the issuer certificate?	✓
Does the certificate have an expected 'extended key-usage(s)'?	✓
Extended key usage : [timeStamping]	
Is the certificate's policy tree valid?	✓
Do certificate's subject names satisfy the imposed name constraints?	✓
Does the certificate contain the authority key identifier certificate extension?	✓
Are all found critical certificate extensions supported?	✓
Are all found certificate extensions allowed for the certificate?	✓
Is the revocation data present for the certificate?	✓
Is an acceptable revocation data present for the certificate?	✓
Latest acceptable revocation : OSCP_InfoNotary-Qualified-TimeStamping-Service-CA-OCSP-Responder_20260916-1639	
Is the certificate not revoked?	✓
Is the certificate not on hold?	✓
Is the revocation freshness check conclusive?	✓
Id = OSCP_InfoNotary-Qualified-TimeStamping-Service-CA-OCSP-Responder_20260916-1639	
Are cryptographic constraints met for the certificate?	✓
Signature algorithm RSA with SHA256 with key size 3072 at validation time : 2026-09-16 16:39 (Id : CERTIFICATE_InfoNotary-Qualified-TimeStamping-Service-2026_20260512-1429)	
Are cryptographic constraints met for the revocation data signature?	✓
Signature algorithm RSA with SHA256 with key size 3072 at validation time : 2026-09-16 16:39	
Is the current time in the validity range of the signer's certificate?	✓
Validation time : 2026-09-16 16:39, certificate validity : 2026-05-12 14:29 - 2032-05-10 14:29	
Is the certificate of revocation data issuer trusted?	✓
Certificate Id = CERTIFICATE_InfoNotary-Qualified-TimeStamping-Service-CA-OCSP-Responder_20240920-1608	
Certificate Revocation Data Selector :	PASSED
Is the revocation acceptance check conclusive?	✓
Id = OSCP_InfoNotary-Qualified-TimeStamping-Service-CA-OCSP-Responder_20260916-1639, thisUpdate = 2026-09-16 16:39, production time = 2026-09-16 16:39	
Is an acceptable revocation data present for the certificate?	✓
Latest acceptable revocation : OSCP_InfoNotary-Qualified-TimeStamping-Service-CA-OCSP-Responder_20260916-1639	
Revocation Acceptance Checker :	PASSED
Is the revocation status known?	✓
Has signing certificate been found for the revocation data?	✓
Can the certificate chain be built till a trust anchor?	✓
Is revocation's signature intact?	✓
Is there a 'thisUpdate' field in the revocation data?	✓
Has the revocation data been produced during the issuer certificate validity range?	✓
Revocation data has been produced at 2026-09-16 16:39 which is in the certificate validity range : 2024-09-20 16:08 - 2029-09-19 16:08	
Does the ResponderId match the OCSP issuer certificate?	✓
Is it not self issued OCSP Response?	✓
Has the revocation data been issued after certificate's issuance time?	✓
Revocation thisUpdate 2026-09-16 16:39, certificate validity range : 2026-05-12 14:29 - 2032-05-10 14:29	
Is the revocation data known to contain information about the certificate?	✓
Revocation thisUpdate 2026-09-16 16:39 is in the certificate validity range : 2026-05-12 14:29 - 2032-05-10 14:29	
Revocation Freshness Checker :	PASSED
Is the revocation information fresh for the certificate?	🔗
Trust Anchor (CERTIFICATE_InfoNotary-Qualified-TimeStamping-Service-CA_20170629-1524)	PASSED
Is the validation time before the certificate's trust sunset date?	✓
Certificate's trust anchor does not have (yet) a sunset date	
Cryptographic Verification :	PASSED
Has the message imprint data been found?	✓
Is the message imprint data intact?	✓
Is time-stamp's signature intact?	✓
Signature Acceptance Validation :	PASSED
Is the signed attribute: 'signing-certificate' present?	✓
Does the 'Signing Certificate' attribute contain references only to the certificate chain?	✓
Does the TST Info field: 'tsa' match the time-stamp's issuer name?	✓
Are cryptographic constraints met for the time-stamp signature?	✓
Signature algorithm RSA with SHA256 with key size 3072 at validation time : 2026-09-16 16:39	
Algorithm Obsolescence Validation :	PASSED
Are cryptographic constraints met for the time-stamp signature?	✓
Signature algorithm RSA with SHA256 with key size 3072 at validation time : 2026-09-16 16:39	
Are cryptographic constraints met for the time-stamp message imprint?	✓
Digest algorithm SHA256 at validation time : 2026-09-16 16:39 for time-stamp message imprint	
Are cryptographic constraints met for the timestamp's issuer certificate?	✓
Signature algorithm RSA with SHA256 with key size 3072 at validation time : 2026-09-16 16:39	
Basic Building Blocks	
REVOCATION - OSCP_InfoNotary-Qualified-TimeStamping-Service-CA-OCSP-Responder_20260916-1639	
Identification of the Signing Certificate :	PASSED

Is there an identified candidate for the signing certificate?	✓
X509 Certificate Validation :	PASSED
Can the certificate chain be built till a trust anchor?	✓
Is the validation time before the certificate's trust sunset date?	✓
Certificate's trust anchor does not have (yet) a sunset date	
Has a prospective certificate chain valid at validation time been found?	✓
Validation time : 2026-09-16 16:39	
Is the certificate validation conclusive?	✓
Certificate Id = CERTIFICATE_InfoNotary-Qualified-TimeStamping-Service-CA-OCSP-Responder_20240920-1608	
Trust Anchor (CERTIFICATE_InfoNotary-Qualified-TimeStamping-Service-CA-OCSP-Responder_20240920-1608)	PASSED
Is the validation time before the certificate's trust sunset date?	✓
Certificate's trust anchor does not have (yet) a sunset date	
Cryptographic Verification :	PASSED
Is revocation's signature intact?	✓
Signature Acceptance Validation :	PASSED
Are cryptographic constraints met for the revocation data signature?	✓
Signature algorithm RSA with SHA256 with key size 3072 at validation time : 2026-09-16 16:39	
Algorithm Obsolescence Validation :	PASSED
Are cryptographic constraints met for the revocation data signature?	✓
Signature algorithm RSA with SHA256 with key size 3072 at validation time : 2026-09-16 16:39	
List Of Trusted Lists EU	PASSED
Is the trusted list fresh?	✓
Is the trusted list not expired?	✓
Does the trusted list have the expected version?	✓
Is the structure of the trusted list valid?	✓
Is the trusted list well signed?	✓
Trusted List BG	PASSED
Is the trusted list fresh?	✓
Is the trusted list not expired?	✓
Does the trusted list have the expected version?	✓
Is the structure of the trusted list valid?	✓
Is the trusted list well signed?	✓
